

## Q1 - Please give an overall score for your learning experience on this course:

Field	Mean	Responses
Please give an overall score for your learning experience on this course:	4.29	7

## Q2 - Please rate your learning and development in this course for each of the le...

Field	Mean	Responses
Understand the logic behind economic models of firm behaviour when agents have conflicting incentives and private information	4.43	7
Be able to apply understanding to financial policy questions related to capital, managerial compensation and financial distress resolution	4.57	7
Be able to assess the effects of legal and financial market institutions on firm financing and governance policies	4.43	7

## Q4 - Support classes: Zihan Huang

Field	Mean	Responses
Lecture organisation and presentation	4.43	7
Learning resources	4.57	7
Management of class discussion	4.29	7
Teaching effectiveness	4.29	7
Creating an inclusive experience	4.43	7

## Q5 - Please make one suggestion to improve this course for next year's cohort:

Please make one suggestion to improve this course for next year's cohort:

Update slides with newer academic literature

There are quite a few typos and unclear phrasing / grammar in the lecture slides and problem set solutions

Could maybe go through how to do the course work well in more detail in the lecture.

I think, as other courses, there is too much material in general. Not really so for this course, but it is a general feeling.

However, I think the material covered is truly interesting.

There are way too many typos in the lecture slides, some of them make the content / sentence hard to understand when going through the slides (I.e. not simple „wrong letter“ typos

## Q6 - Please add any further comments on this course:
